

Purdue Extension Services' HOA Resident Classes

Separate classes will provide basic knowledge of fundamental garden and landscape topics to residential homeowners within a homeowners association (HOA). This would enable residents of a HOA to enhance not only their own residence, but also their community as a whole.

Seminars will be presented usually in the evenings at or near the community. There will be a nominal fee to cover handouts. There will also be a minimum enrollment required to conduct a session. If you have any questions or would like further information, please contact Ron Rothrock at 317.525.3580 or ron.rothrock@gotown.net. Below are the classes and the topics that will be covered during the sessions.

I. Landscape Design

- A. Develop a plan
